

JUNE 1943

VOL. II No.8

## THE MECHLECIV NEEDS MEN!

About a year ago, a new child, conceived by Fred Holcomb, president of the Engineers' Council, was born into the Engineering School at George Washington University. This child, destined to become a newspaper, was duly named the MECHLECIV with the hope of its parents that each engineer, regardless of his branch, would consider it his own.

Since that time, the engineers have apparently watched the growth of the paper with interest and enthusiasm. The staff has individually and collectively appreciated the pats on the back for this piece of work, and has done all in its power to make it live up to its name and represent each branch and each organization of the school.

To continue doing this, however, the staff, consisting at present of Holcomb, Berkley, Barauk, and the correspondents from the various organizations, needs more than just appreciation. That helps to make it seem worthwhile, but it doesn't get the paper to you!

Additional help is required to keep the MECHLECIV rolling. Some of this help must come from the Freshmen. To the Freshmen, being on the MECHLECIV staff is especially beneficial since it is an excellent way to become acquainted with the men of the Engineering School, and to get first hand information on what is going on.

### ENGINEERS' SCHEDULE

June 16—ENGINEERS' MIXER  
June 23—Sigma Tau  
June 30—Theta Tau  
July 5—Next issue of MECHLECIV  
July 7—Societies' Meetings  
Sigma Tau

No journalistic talents are required. Meetings are held on the last Sunday in each month, and every one who has come says they are fun as well as work.

Of all organizations on the campus, the Engineering School is the closest kint. It is also the only organization to make a success of a separate publication. Let's keep it up. To do that there must be a sufficient staff so that the absence of one member doesn't mean missing a deadline.

Men, the MECHLECIV is asking for help. Don't let it down.

And to each of you, let's have suggestions and help that is essential to keep the MECHLECIV alive.

WE'LL BE LOOKING FOR YOU AT THE  
JULY MEETING.

BUY U.S. WAR BONDS & TILL IT  
HURTS.

# ENGINEERS MIXER

ROOM - D-105

JUNE 16  
WEDNESDAY  
8<sup>00</sup> PM

Do you know why you should be at the mixer? Well there are lots of reasons, and principle among them is that you will have a good time. Then there is the point that it is a time to meet those professors that you have not already met in your classes, and meet those that you have met in classes on a little different basis. Another point is that you will meet a lot of the students that you did not know were even here, you can find out who is doing things on the campus. Then too, you know that you want to join something in the way of a activity and you can find out what and where. So be sure to drop in and see us all next Wednesday evening.
